

## **Summary of Proposed Research**

### **Background and Rationale:**

- What is the purpose of the study (please include a brief review of the literature supporting your study).
- What research questions are you hoping to answer?

### **Study Design and Procedures:**

- Please describe your study population and any inclusion/exclusion criteria.
- How will you recruit participants?  
Consider issues such as coercion, parent consent, etc.
- How will you get consent?
- Please describe your measures and answer the following for each measure:  
Who is the author?  
How many items, what types of items, what subjects are covered, etc.
- Please describe your procedures in detail:  
What will the participant do as part of this study?  
Where will you collect data – what is the setting?  
Who will collect the data?
- Will you provide a benefit to participants (e.g., extra credit, gift card, etc.)? If so, please describe.
- Are there any risks like physical harm, psychological harm, legal jeopardy? If this is a sensitive topic how do you plan to protect the participants from undue trauma?

### **Data Use and Risk Minimization:**

- How will the data be used, e.g., presentation, publication, etc.?
- What will you do with the data when the study ends?
- Is there any chance that the participants will be identifiable?
