

LEARN

PSYCHOLOGY AT CABRINI

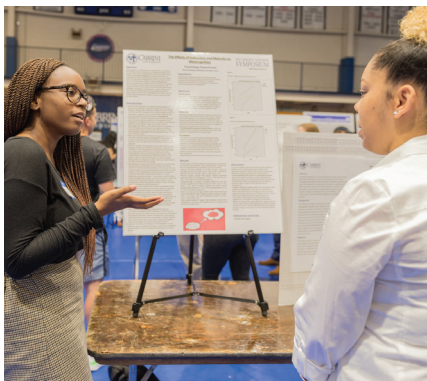

When you major in **Psychology** at Cabrini, you will learn about human behavior and how to apply that knowledge to personal, societal, and organizational issues in a diverse world.

In your core courses, you'll master research methodology, get hands-on laboratory experience, and gain assessment and evaluation skills.

You'll gain insight using major research findings, be introduced to the nature of scientific inquiry in the field, and use empirical applications to understand human behavior.

Psychology majors have interned or worked at Albert Einstein Hospital, Belmont Behavioral Health, Devereux Pennsylvania, First Step Educational Support Program in West Chester, the University of Pennsylvania, and more.

After earning the Bachelor of Science (BS) in Psychology, a majority of our majors move on to advanced degrees. Graduates have become professors and teachers, doctors, social workers, counselors, research analysts, camp directors, and much more.
